With 10 years of expertise as a Product Designer, my mission has always been to help startups and major players hit their goals through design. Whether it's refining mobile apps or optimising web platforms, I'm dedicated to understanding user needs and translating them into polished solutions. I excel in dynamic work environments, thriving on challenges and driving innovation.

## Travel break

10/2024 - 03/2024

## Sr Product Designer (UX/UI)

01/2023 - 10/2023\*

Company: Portfolio REIT / Full Time / London

Solo Product Designer for the startup Portfolio, a Fintech company offering a unique REIT (Real Estate Investment Trust) proposition in the UK.

- Defining workflow and methodologies of design within the company
- Research and data analysis (Competitors analysis, User interviews, Personas)
- Design system setup and maintenance
- Restyling of the full app, including versions 1.5 and a completely new design
- Collaborative work in daily stand-ups with PMs, Front/Back-end Devs, QA

\* Business closure

## Sr Product Designer (UX/UI)

01/2023 - 10/2023

Company: ROKi Digital / Full Time / London

1 year and 9 months

Solo Product Designer where I could led a multitude of projects spanning various sectors including Fintech, E-commerce, and SaaS:

- Defining UX processes and methodologies within the company
- Delivering research workshops (Persona, Empathy Maps, New Business Canvas, SWOT, Prioritisation...)
- Creating low/mid/high fidelity designs
- Building prototypes to test in front of users (including A/B testing, remote testing, interviews post website use...)
- Designing and building clients' Design System

## **Sr Product Designer (UX/UI)**

04/2020 - 02/2021

Company: Webegin / Freelance / London

10 months

Principal Product Designer at the startup 'webegin.today,' a job platform that addresses bias in the hiring process through anonymous job applications:

- Designing the website flow, creating wireframes, and structuring the information architecture to enhance the website's user experience and the new hiring process.
- Defining the website's UI and brand identity to establish a cohesive visual identity for the platform and the company.
- Conducting one-on-one user interviews with hiring managers and job seekers to identify challenges they face during the hiring process or job search, and translating these insights into actionable solutions for the platform.
- Developing low to mid-fidelity prototypes for user testing, incorporating feedback to refine the website's interface and user experience. This process includes A/B testing, remote testing, and post-usage interviews to gather comprehensive insights.

## **Product Designer (UX/UI)**

11/2019 - 04/2020

Company: Doble Engineering / Freelance / London

6 months

Working to improve the UX of the products and giving support to the team with design related topics:

- Low/Mid Prototyping of manuals (digital and print) using Agile methodology - Creating the new UI for the manuals and on-line content
- Defining the style of the new products catalogue
